

March 2024

# **Executive Summary**

- Belgium's GDP is expected to **increase** by **1.4%** in **2024** (Federal Planning Bureau, 02/2024), after having grown by 1.5% in 2023. Business confidence is stable although somewhat below its long-term average, while consumer confidence is above its average.
- Belgium's **unemployment rate** stands at **5.7%** (December 2023). In Q3 2023, Belgium's **job vacancy rate** was **4.7%.** This was then the **highest** of the **EU**.
- In **2023**, Belgium's government deficit would have amounted to **-4.60%** of GDP (Federal Planning Bureau, 02/2024). The **2024** deficit is expected to amount to **-4.60%** as well.
- Belgium's debt ratio is expected to have increased to **105.3%** (as a result of the cash surplus created by the 1-year State Note, which is accounting for 1.5% of GDP) and would **increase** to **106.2%** in **2024** (Federal Planning Bureau, 02/2024).
- Belgium has one of the highest net international investment positions (53.6% of GDP in 2022) of the EU. The net financial wealth of the Belgian households amounts to EUR 1,163 billion or 201% of GDP.
- The 2024 funding plan foresees a long-term issuance of 45.00 billion euro, of which 41.00 billion euro of OLOs. The 1-yr state note issuance is anticipated to amount to 13.50 billion euro.

# 1. The Belgian Economy

#### Belgium's GDP per capita has advanced further in comparison with EU countries

Belgium's GDP per capita was 20.6% higher than the EU average. Belgium ranks 6th in the EU in this respect (\*).

(\*): If both Luxemburg (high foreign workforce), and Ireland (whose GNI is a better measure for its economy than its GDP) are excluded, **Belgium ranks 4**<sup>th</sup>.

### Belgium's economy would have grown by 1.5% in 2023, and would do so by 1.4% in 2024

|                              | 2020  | 2021  | 2022  | 2023f <sup>(1)</sup>        | 2024f <sup>(1)</sup> |

Source.

(1) Federal Planning Bureau, February 2024

(2) EC Winter forecast, February 2024

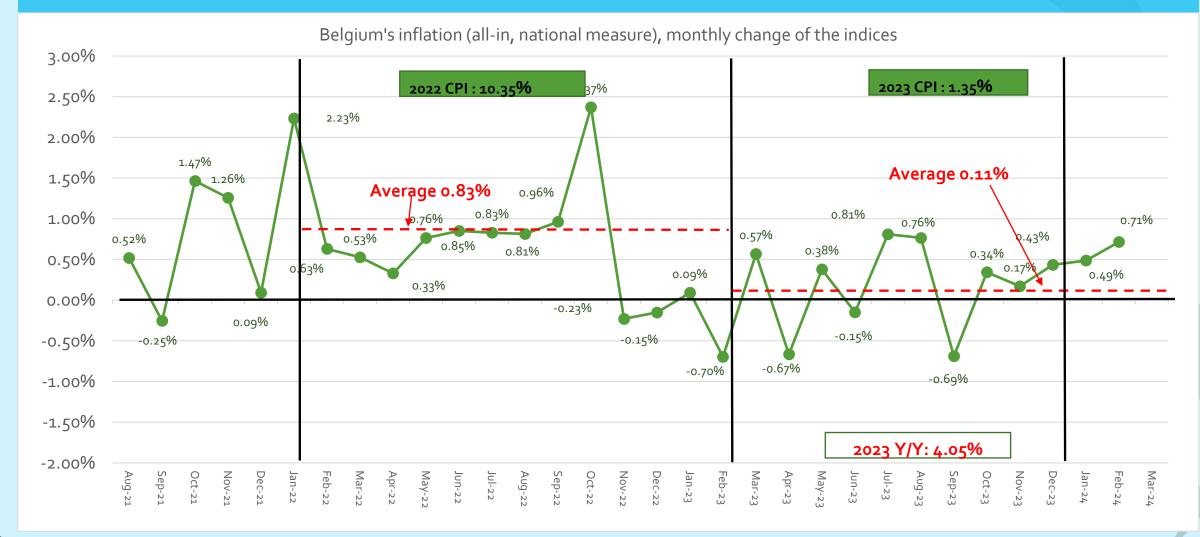

#### Business and consumer confidence are close to their long-term average

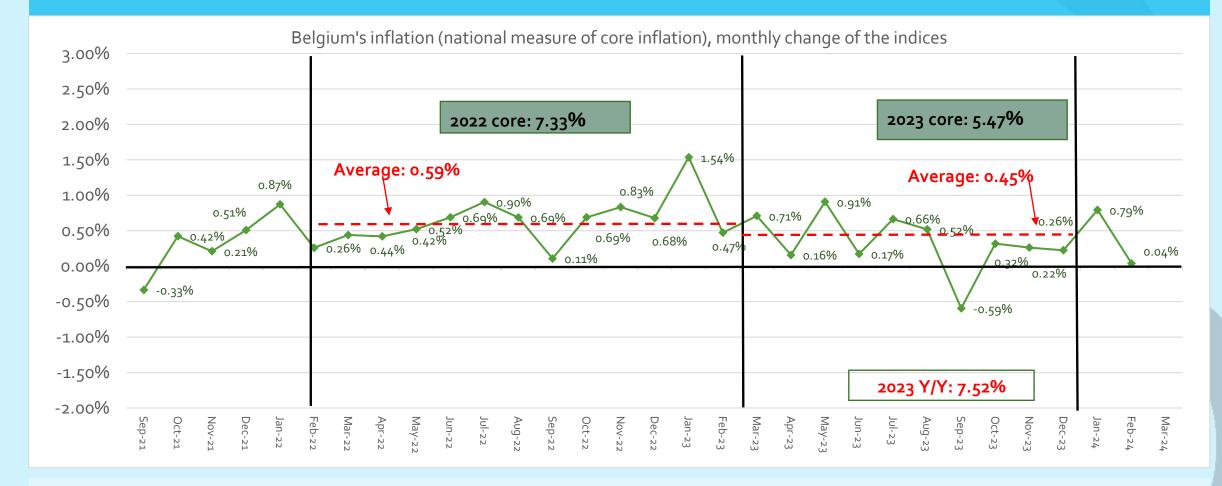

#### **Consumer price inflation was sharply lower in 2023**

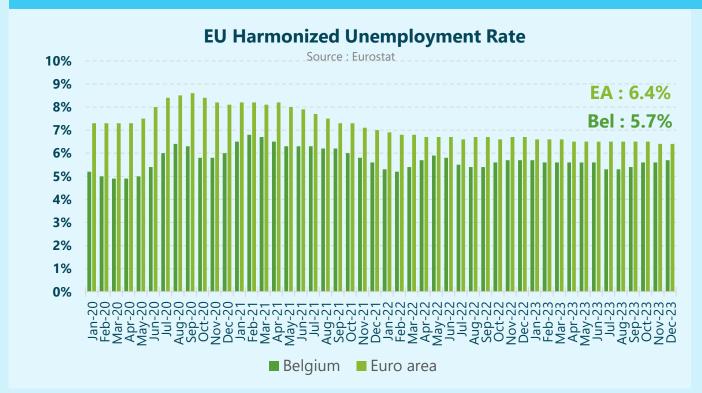

#### ... with core inflation was trending downwards

#### The labour market continues to perform

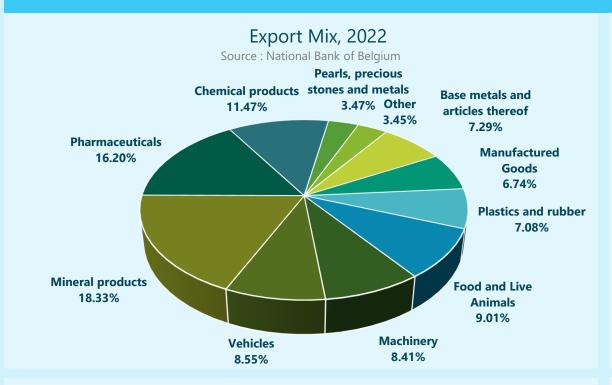

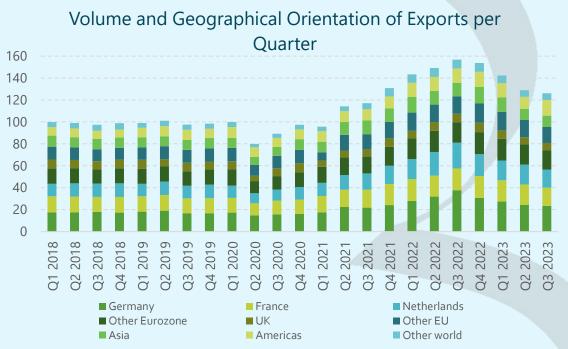

- Belgium's unemployment rate remains at a low level, at 5.7%.
- In 2022, employment increased by 101K (an absolute record since 1953). It would further increase by 45K in 2023 (NBB December 2023 projections). The harmonized employment rate would rise to <u>72.4%</u> as per end of 2023.
- In Q3 2023, Belgium had the <u>highest</u> job vacancy rate (4.70%) of the EU.

#### Belgium has a diversified and open economy, evidence of which is given by its exports

 Belgium's exports are a mix of cyclical (chemical products, machinery) and non-cyclical (pharmaceuticals, food) products.

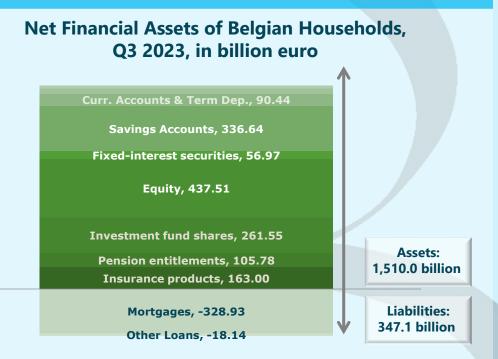

- Exports have strongly increased since Q1 2021, part of it is explained by high energy prices (import-export of mineral oil and gas).
- 44.8% of exports go to the three neighbouring countries.
- Exports to the UK decreased to 5.4% of total ( $\pm 7.5\%$  before).

#### Belgium has maintained a positive net international investment position

The net household wealth is also still elevated.

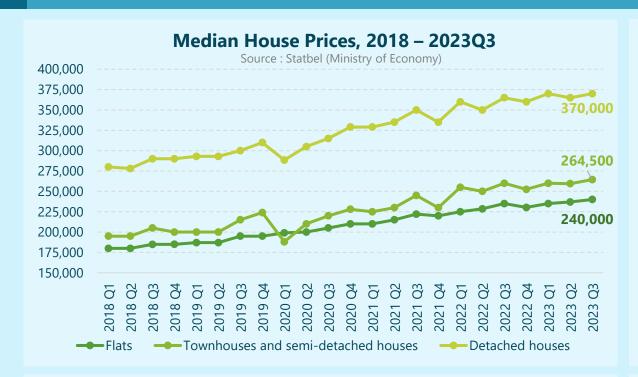

- Belgium's favorable net international investment position was maintained at a high level.
- Net household financial wealth now amounts to 1,163 billion euro, or **201% of GDP**.
- Total net household wealth (including real estate) was estimated at EUR 2,944 billion on 31 December 2021.

#### Housing prices were showing first signs of stabilisation in 2023

• The number of real estate transactions was sharply lower in 2023 (- 35% compared to 2022):

| 2021 S1 | 2022 S1 | 2023 <b>S</b> 1 |
|---------|---------|-----------------|
| 59,970  | 77,194  | 50,531          |

Mortgage loans

|                | 2022  | 05/2023 |
|----------------|-------|---------|
| Non-performing | 0.66% | 0.63%   |

At the end of 2022, **75%** of mortgage loans had a **fixed** rate

Source : Statbel (Ministry of Economy) & NBB

# 2. Public Finances

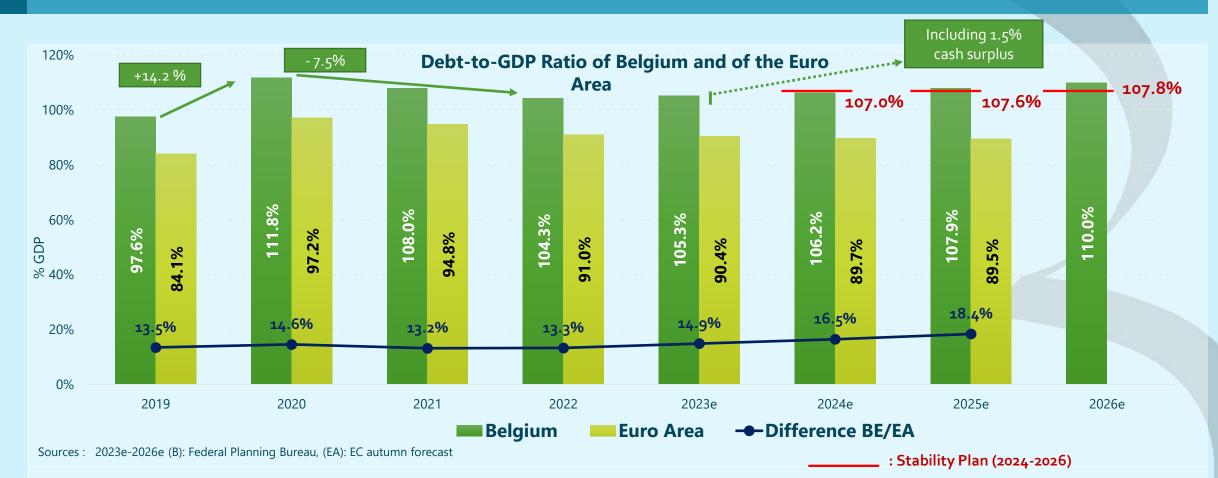

#### Belgium's government deficit would have widened in 2023. It is expected to stabilize in 2024.

- According to its stability Program, and according to the expected new EU rules on deficit and debt, Belgium's public finances will need to improve as from 2025 onwards, compared to the expected deficits on unchanged policies
- The improvement of Italy's deficit in 2023 (statistical treatment of renovation support) is a big driver for the improved EA budget deficit in 2023.

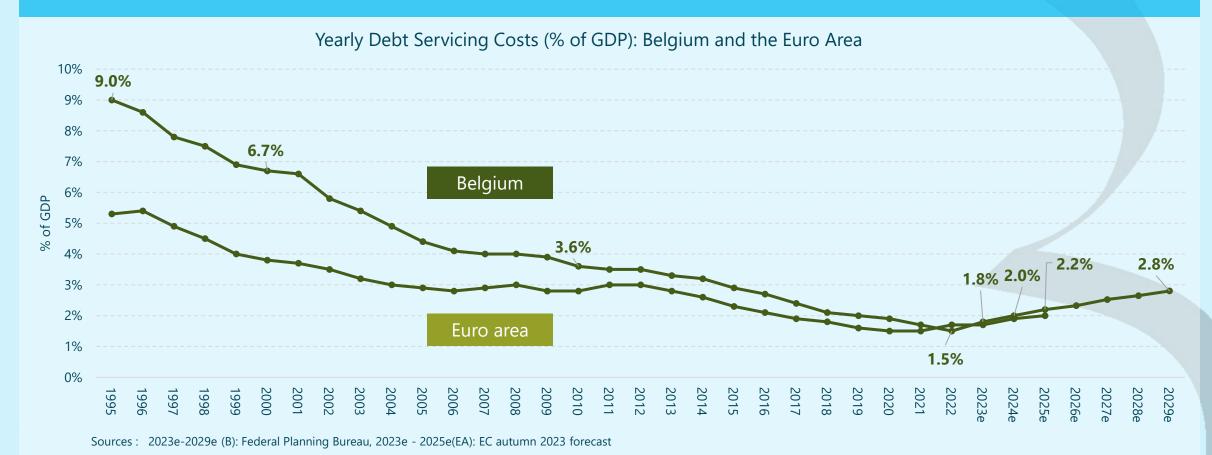

#### Belgium's debt ratio would have increased by 1.0% in 2023. It would increase further, by 0.9%, in 2024

- The increase in 2023 is mainly due to the cash surplus that resulted from the successful State Note issuance (1.5% of GDP).
- Cash holdings and financial investments are indeed not deductible from gross debt.

#### Debt servicing costs have strongly decreased over the last 25 years, but are rising again now

- Belgium's debt servicing costs would increase from 1.8% of GDP in 2023 to 2.8% in 2029.
- Interest rate assumptions: 10-yr rate at +/- 3.0% in 2024-2029, 3-month rate at around 2.2% from 2025 onwards

# Belgium has high credit ratings, with stable outlooks for most of them

|                   | Long term rating | Outlook  | Most recent report    | Next report(s)           |
|-------------------|------------------|----------|-----------------------|--------------------------|
| Standard & Poor's | AA               | Stable   | 17 March 2023 (*)     | 26/04/2024<br>25/10/2024 |
| Moody's           | Aa3              | Stable   | 02 November 2023 (**) | 12/04/2024<br>11/10/2024 |
| Fitch Ratings     | AA-              | Negative | 16 February 2024      | 16/08/2024               |
| DBRS              | AA               | Stable   | 26 January 2024       | 26/07/2024               |

(\*): on September 15<sup>th</sup>, S&P published a credit report, but no rating action was considered (\*\*) on November 2<sup>nd</sup>, Moody's published a credit opinion, but no rating action was considered

- Fitch maintained the negative outlook from March 2023 in September 2023 and February 2024.
- Belgium created in 1830 has never defaulted (for a comparison with other countries see C.M. Reinhart and K.S. Rogoff, This time is different Eight centuries of financial folly, Princeton, 2009, p. 99).

# 3. Debt Management Strategy

#### The average life of the debt portfolio increased again, with an implicit yield that is now rising.

• The minimal average life was maintained at 9.25 years in 2024. The average maturity is now <u>1.31 year longer than required</u>.

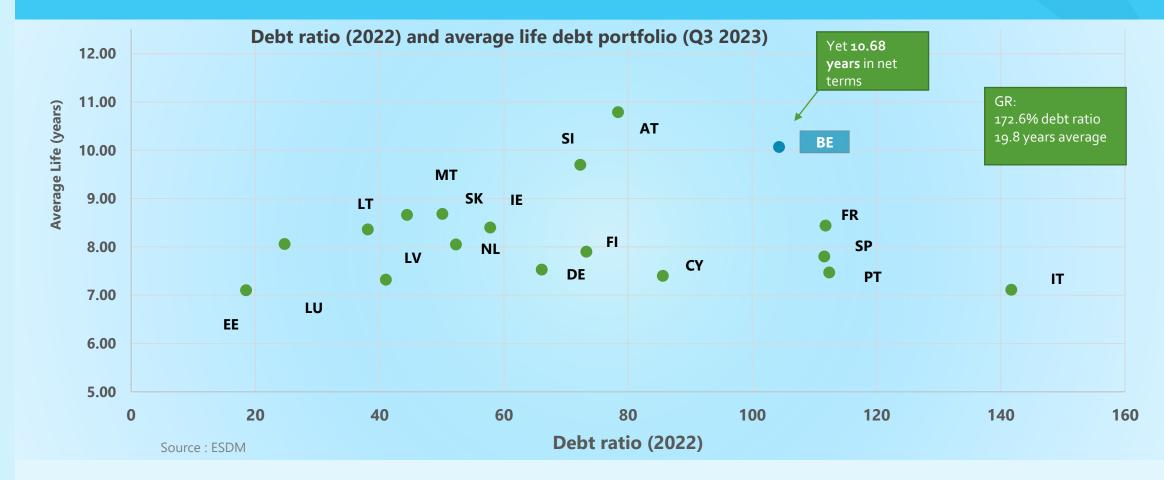

#### The government debt's risk limits are unchanged in 2024

|                                   | 2024                                       | 2023       | 2022       | 2021       | 2020       |
|-----------------------------------|--|------------|------------|------------|------------|
| Minimal average life              | <b>9.25 years</b> (Jan 2024 : 10.56 years) | 9.25 years | 9.25 years | 9.25 years | 9.00 years |
| Maximum 12-month refinancing risk | <b>17.50%</b><br>(Jan 2024 : 14.13%)       | 17.50%     | 17.50%     | 17.50%     | 17.50%     |
| Maximum 12-month refixing risk    | <b>17.50%</b><br>(Jan 2024 : 14.58%)       | 17.50%     | 17.50%     | 17.50%     | 17.50%     |
| Maximum 60-month refinancing risk | <b>42.50%</b><br>(Jan 2024 : 40.25%)       | 42.50%     | 42.50%     | 42.50%     | 42.50%     |
| Maximum 60-month refixing risk    | <b>42.50%</b><br>(Jan 2024 : 40.70%)       | 42.50%     | 42.50%     | 42.50%     | 42.50%     |

• There is currently a significant margin in the average life and the 12-month refinancing/refixing limits

#### Belgium's debt has the highest average life of all but one of the most indebted EA-19 countries

• The ESDM methodology for calculating the average life of the government debt is different from Belgium's methodology, leading to lower figures of the average life (Belgium measures the average life of the <u>net debt</u>, which is 10.68 years).

### The redemptions of long-term debt are consequently limited in size

On average, in 2024-2028 redemptions amount to 30.1 billion euro, equivalent to 5.0% of 2024 GDP.

### This should lead to manageable gross funding requirements in the future

|                              | 2023e | 2024e | 2025e | 2026e |
|------------------------------|-------|-------|-------|-------|
| Net borrowing                | 27.40 | 21.48 | 16.31 | 14.69 |
| Redemptions                  | 21.13 | 29.27 | 20.19 | 26.10 |
| Pre-funding                  | 0.40  | 1.50  | 4.32  | 2.71  |
| Other                        | 0.10  | 0.67  | -     | -     |
|                              |       |       |       |       |
| Gross Borrowing Requirements | 49.04 | 52.92 | 40.82 | 43.50 |

• Net borrowing is the one included in the government budget for 2024 and in the Stability Program 2023-2026 for the years 2025-2026.

# 4. The 2024 Funding Plan

#### In 2023, the Agency continued to issue mainly long-term loans

#### **OLO Issuance details in 2023 (billion of euros)**

| Month    | 5-year | 10-year | 15-year | 20-year | 30-year | 40-50 yr |
|----------|--------|---------|---------|---------|---------|----------|
| January  | -      | 7.00    | -       | -       | -       | -        |
| February | -      | -       | -       | 0.20    | 5.00    | 0.31     |
| March    | 1.85   | 1.74    | 0.86    | -       | -       | -        |
| April    | 1.55   | 1.82    | -       | -       | 1.28    | -        |
| May      | -      | 0.48    | -       | 4.00    | -       | -        |
| June     | 1.26   | 1.50    | -       | -       | 1.80    | -        |
| July     | -      | 1.32    | -       | -       | 0.95    | 0.92     |
| August   | 1.59   | 2.22    | -       | -       | -       | 0.31     |
| Sept.    | -      | 1.31    | -       | -       | 0.99    | -        |
| Oct.     | -      | 2.22    | -       | -       | 1.40    | -        |
| Nov.     | -      | -       | 0.29    | -       | -       | 0.21     |
| Dec.     | -      | -       | 0.50    | -       | -       | -        |
| Total    | 6.25   | 19.61   | 1.65    | 4.20    | 11.42   | 1.75     |

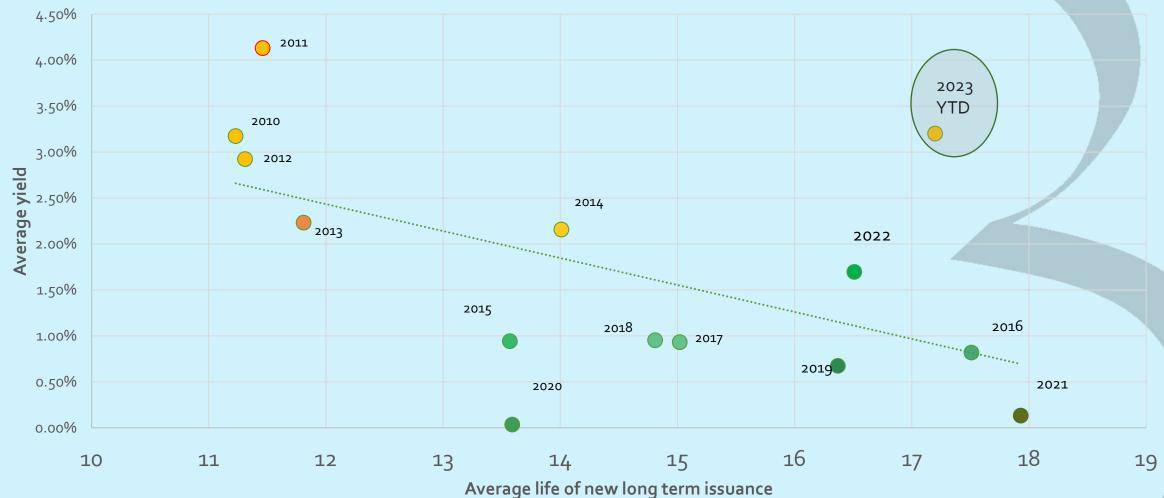

44.82 billion euro of OLOs have been issued with:

- an average maturity of <u>17.32</u> <u>years</u>
- an average yield of 3.21%

#### This occurred at higher funding costs than in the recent past

# In 2024, long-term issuance would be stable compared to 2023

| (figures in EUR billion)      | 2023            | 2024  | 2024  |
|-------------------------------|-----------------|-------|-------|
|                               | Latest forecast | Plan  | 05/03 |
| Financing Requirements        | 49.04           | 52.92 |       |
| Net financing requirements    | 27.40           | 21.48 |       |
| Redemptions of MT/LT debt     | 21.13           | 29.27 |       |
| Pre-funding (buy backs)       | 0.40            | 1.50  |       |
| Other financing requirements  | 0.10            | 0.67  |       |
|                               |                 |       |       |
| <b>Funding Means</b>          | 45.25           | 45.00 | 13.01 |
| OLO issuance                  | 44.82           | 41.00 | 13.01 |
| EMTN issuance & Schuldscheine | 0.00            | 2.00  | 0.00  |
| State Notes                   | 0.43            | 2.00  | 0.00  |
|                               |                 |       |       |
| Change in short term debt     | 3.79            | 7.92  |       |
| Treasury Certificates         | -13.60          | 4.72  |       |
| 1-yr State Notes              | 21.89           | -8.40 |       |
| Other ST debt and assets      | -4.51           | 11.60 |       |

Gross borrowing increases by EUR 3.88 billion

Stable long-term funding & less OLO issuance

13 billion euro done yet

Increase in outstanding amount of Treasury Certificates, decrease of 1-yr State Notes and almost full use of cash surpluses

#### Main elements of the 2024 funding strategy

- **Three** new fixed-rate OLO benchmarks via syndications:
  - a new 10-year benchmark

→ 7.0 billion 10-year done

- a medium term maturity
- a long term maturity
- → 5.0 billion 30-year done
- Re-opening of existing lines through Auctions, based on market demand, 11 times throughout the year.
- Optional Reverse Inquiry (ORI) facility again possible. 8 times throughout the year, for a maximum of EUR 500 million (max. 2 lines).
- **Both** existing **Green** OLOs can be reopened in the OLO auctions and in the ORI facility, estimated amount of green expenditures for 2024: 4.5-5.0 bn.
- EMTN (including inflation-linked) and Schuldscheine for EUR 2.0 billion, subject to competitive funding levels.
- **State Notes** (retail product) for EUR 2.0 billion (4 times throughout the year).
- Increase of outstanding amount of Treasury Certificates to EUR 25.0 billion
- 1-yr State Note issuance anticipated at EUR 13.50 billion → 0.413 billion done

# New Green OLO Framework

All\_press\_releases

- New Green OLO Framework, published in June 2022.
- Following the current best Green Bond market practices:
  - ICMA Green Bond Principles;
  - Definitions eligible expenditures aligned with EU Taxonomy
     & Delegated Acts
- Second Party Opinion by Moody's ESG Solutions
  - Advanced ESG performance
  - Advanced contribution to sustainability issues.
- Clean transportation remains the main green sector with 92% of the allocation.
- Investments in activities related to nuclear, armament and fossil fuel are excluded.
- The Green OLO framework and allocation reports are available on the website of the BDA.

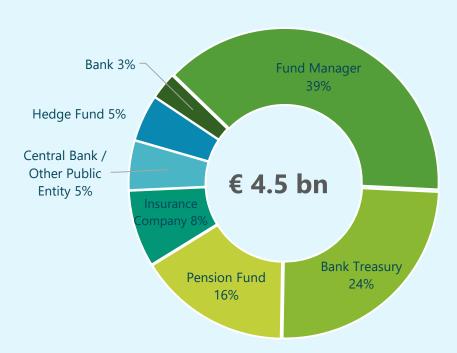

#### New Green OLO 96

#### Kingdom of Belgium new EUR 4.5bn 2.75% Green OLO 96 due April 2039

#### Geographical distribution

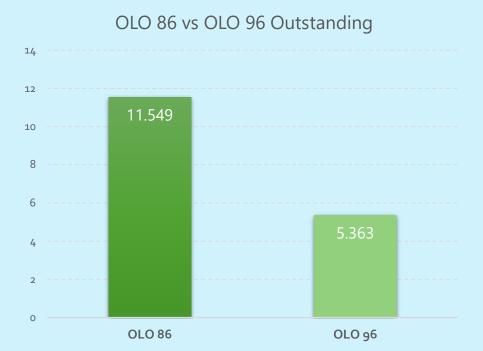

- The Kingdom of Belgium has updated the Green OLO Framework and, through the Belgian Debt Agency, successfully launched its second Green OLO.
- Over 60% of the total size of this new Green OLO was allocated to investors that embed Environmental, Social and Governance targets or criteria into their investment strategy.

#### Combined Allocation and Impact report

#### Two-dimensional reporting in 2022

- Allocation and impact can be found in the same report 2022
- The 2022 report covers both OLO (OLO 86 and OLO 96)
- Allocation & impact report 2022 available on the website of the BDA
- Data available in a spreadsheet on the website of the BDA

| Expenditures  | Allocated amounts<br>2022 (Mio EUR) | Period covered by the assessment   | Assessed impact                                 | Assessment (kt) |

## Other government debt products

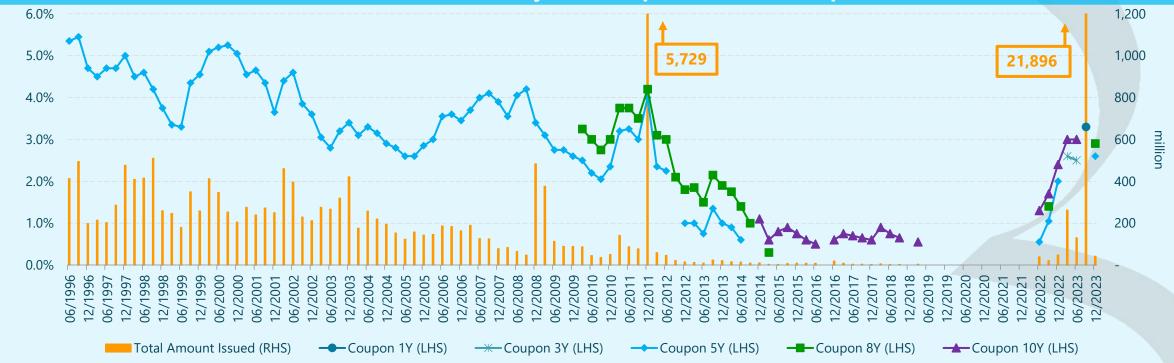

The Belgian Debt Agency issues other forms of government debt as well.

|  | Medium and Long-term   | Short-term                              |
|--|--|---|
| STANDARDIZED<br>(EURO ONLY)                  | OLOs ('Obligations lineaires / Lineaire obligaties') & State Notes (exclusively retail primary market) | <b>TC</b><br>('Treasury Certificates')  |
| FLEXIBLE<br>(FOREIGN CURRENCIES<br>POSSIBLE) | EMTN<br>('Euro Medium Term Notes')<br>&<br>Schuldscheine   | <b>ECP</b><br>('Euro Commercial Paper') |

#### In September, the 1-year State Note resulted in an amount of EUR 21.9 billion

Issuance results of the State Notes (1, 3, 5, 8 and 10 years) compared with the coupons (1996-2023)

- Once again, the Belgian private investor demonstrated that he/she was willing to finance the State when he/she feels that the offer is reasonable.
- After more than 3 years of interruption due to too low rates, State notes were reintroduced in June 2022:
  - The 3 campaigns of 2022 recorded a total amount of EUR 108.7 millions.
  - The third campaign of 2023 (September) consists of a 1-year State Note, and has resulted in an amount of <u>EUR 21.9</u> billion (!)
  - The 3 other campaigns of 2023 recorded a total amount of EUR 434.2 millions.

#### The State Note is a simple and transparent financial product for households

#### **The State Note**

- A federal government bond that is exclusively available on the primary market to households, non-profit organizations and foundations
- Quoted on the stock exchange
- Issued at par and for a whole number of years (3, 5, 8 and 10) (and now also 1), the coupon being a fixed-rate annual coupon
- In principle 4 issuances per year, each having a 7-day subscription period
- Either directly purchased via the website of the Debt Agency, either through one of the 14 financial institutions that distribute it
- First issuance on 18 June 1996 (412 million euro).

### From time to time, it is extremely popular

### **The 1-yr State Note issuance of 4 September 2023**

- First time issuance of a 1-year State Note. Coupon 3.30%, withholding tax 15.0% (2.81% net return)
- Massive interest: **21.90 billion euro** issued (previous record: 5.7 billion euro in December 2011)
- Of which **7.1** billion euro or <u>238,565</u> subscriptions through the **Agency's website** (one every 3 seconds), and an average subscription of 29,618 euro.
- And 14.8 billion euro issued through financial institutions. The average subscription amounts to 47,221 euro, the number of subscriptions being 304,106.
- In total 542,671 subscriptions
- No money spent on a marketing campaign.

### **Consequences for the Debt Agency**

### **The 1-yr State Note issuance of 4 September 2023**

- Limitation of issuance of T-bills (Treasury Certificates), down by 10.2 billion euro
- Decrease of long-term funding by 2.25 billion euro
- Lower 1-yr funding cost than the 3.64% cost observed for 1-yr financing on 4 September 2023:

```
3.30\% + 0.20\% (fees) -0.50\% (withholding tax) +0.14\% (estimated loss on taxes elsewhere)
```

```
= 3.14% << 3.64%.
```

- In addition, 10-yr spreads towards France and Germany decreased by 3 to 4 bp
- Investment of the structural cash surplus at 3.64% + ... (3.80%)

### **Euro Medium Term Notes (EMTN) program**

The EMTN program is very diversified in terms of composition.

Overview EMTN-deals (amount issued and number of deals): 70 deals since 2008 for a total of EUR 23.31 billion

|     | Plain Vanilla<br>Public (fixed or FRN) | Plain Vanilla<br>Private (fixed or FRN) | Structured            |
|-----|--|---|-----------------------|
| EUR | EUR 1.15 billion (6)                   | EUR 4.70 billion (26)                   | EUR 1.44 billion (10) |
| USD | USD 15.25 billion (11)                 | USD 3.55 billion (6)                    |                       |
| GBP | GBP 600 million (2)                    |   |                       |
| CHF |  | CHF 100 million (1)                     |                       |
| JPY |  | JPY 24.0 billion (3)                    |                       |
| NOK | NOK 4.3 billion (4)                    | NOK 0.5 billion (1)                     |                       |

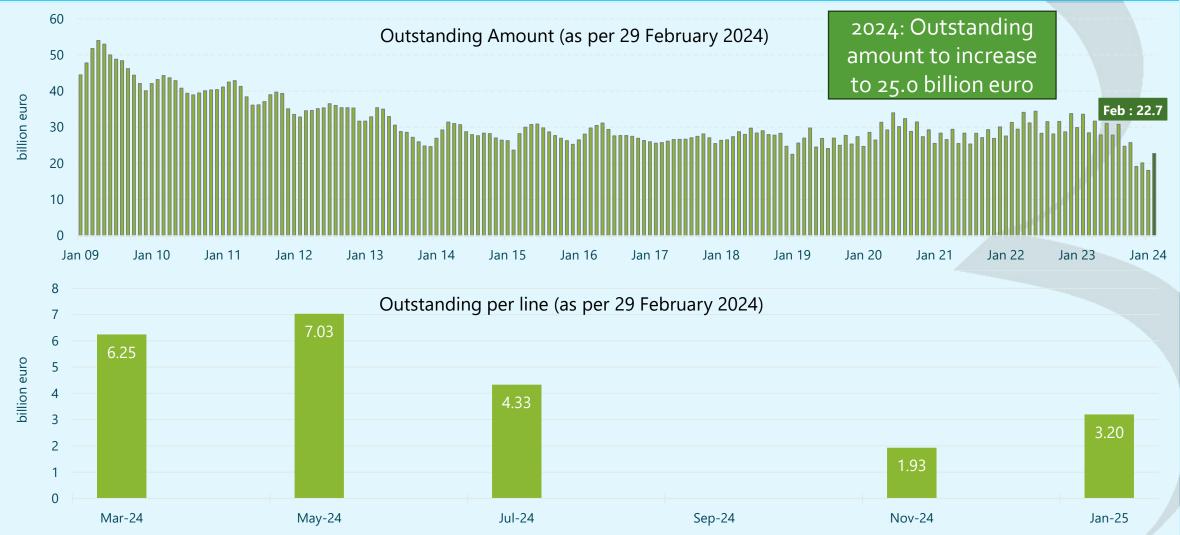

#### Some structures:

- Plain vanilla EUR
- Foreign currency swapped to EUR
- Puttable
- Inflation linked & other structures

### **Treasury Certificates (TC)**

The outstanding volume of Treasury Certificates (Belgium's T-Bills) broadly remained stable. Sharp decrease in September 2023.

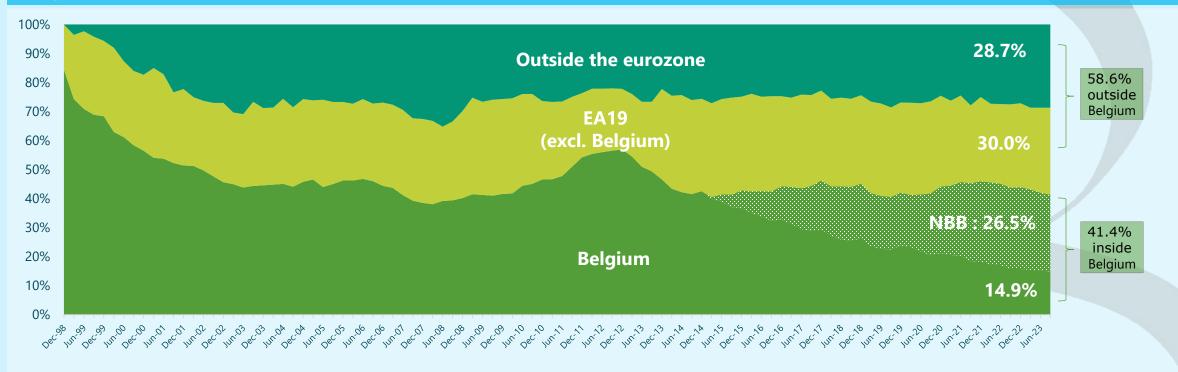

# 5. OLO Secondary market & holdership

### Sustained foreign investor participation in the OLO market

Belgium's federal Government bonds (OLOs)

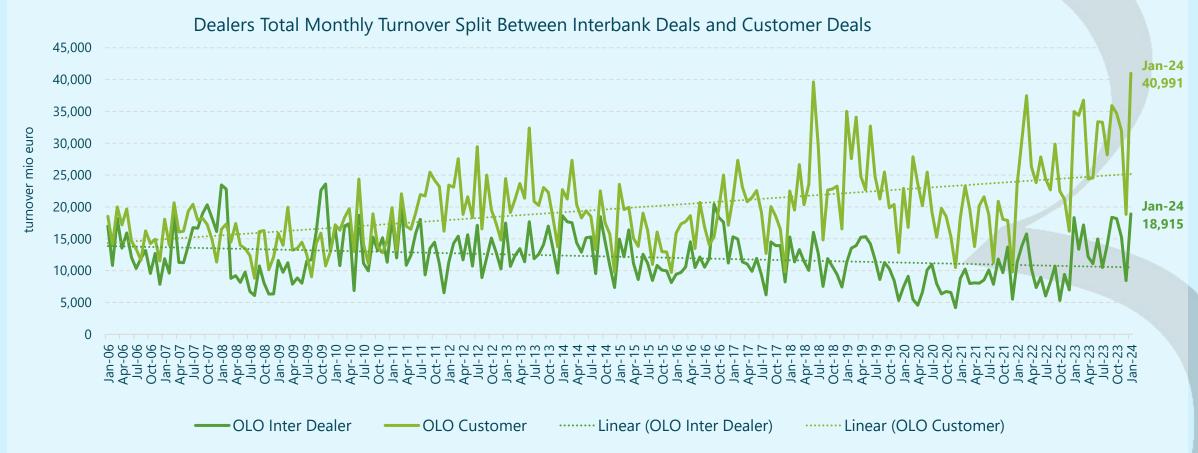

At the end of September 2023,

- The National Bank of Belgium owned 26.5% of the OLOs as part of the then 41.4% held by domestic investors. By then, the Eurosystem possibly held around 29.4% of all OLOs.
- The domestic private holdership is not decreasing any more as domestic private investors are partially compensating for the NBB's declining holdership.

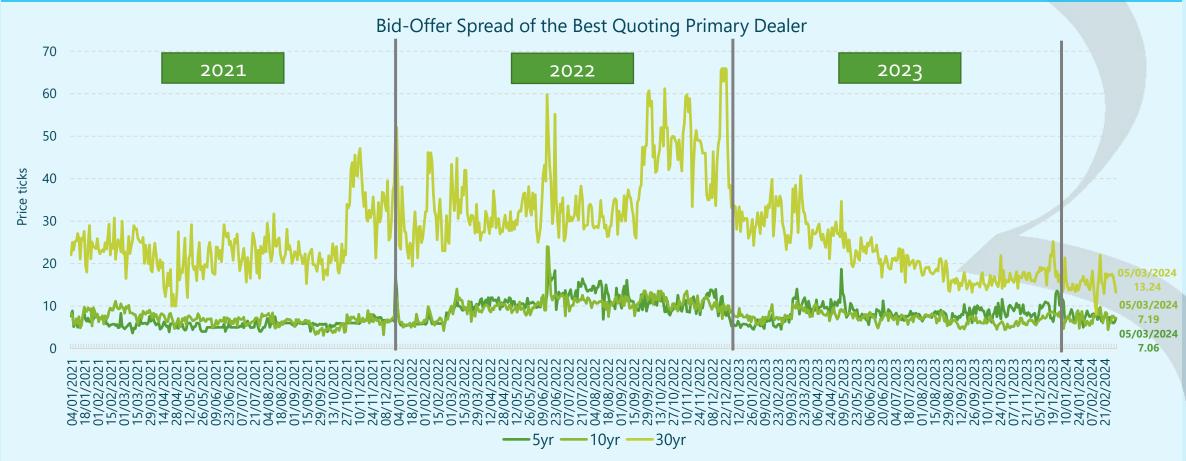

### The OLO turnover increased again in 2023

The OLO customer turnover (excluding QE) on the secondary market remains high.

### In 2023, OLO bid-offer spreads decreased to pre-crisis levels

• The Debt Agency noted an increasing use of its repofacility, by which it creates temporarily OLOs for delivery to the dealer requesting them.

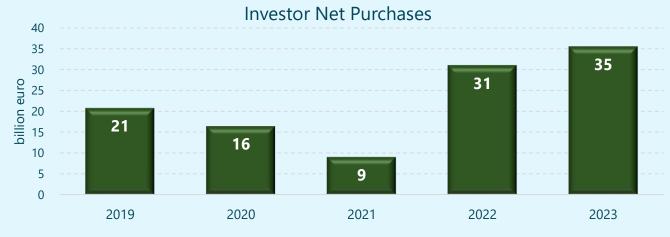

### HRF reporting: OLO investor turnover and net purchases

Total of syndications + secondary market, excluding QE

• In 2023, OLO turnover totaled 387 billion euro, which is a new record (67 billion euro more than in 2022).

Investors bought a total of 35 billion euro of OLOs, which is some 4 billion higher than in 2022.

### HRF reporting: OLO investor turnover by type of investor and geography

Total of syndications and secondary market turnover, excluding QE, 2023 entire year

- Fund managers remain the most important actors, followed by hedge funds
- Participation of customer banks, while increasing as well, is still lower than 4/5 years ago
- Participation of public entities (outside QE) increases significantly in relative terms
- Insurance companies/pension funds: reported through fund managers?

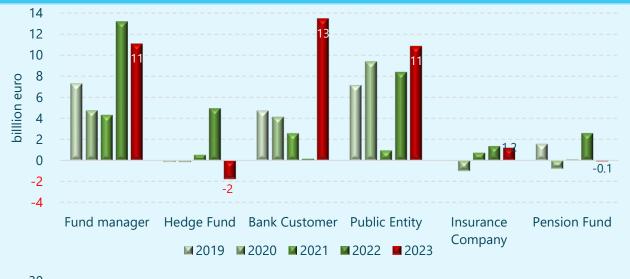

- In 2023 YTD, the rest of Europe overtook the euro area as the n°1 region in terms of turnover
- In the Americas, the turnover is stable compared to 2022
- Significant increase in relative terms in Asia, representing 12% of the total turnover (vs 8% in 2022)

### HRF reporting: OLO <u>purchases</u> by investors in net terms

### Total of syndications and secondary market turnover, excluding QE, 2023 entire year

- The increase in net purchases in 2023 is almost entirely due to customer banks purchasing a lot more OLOs
- The bank customer and public sector buying is quite important relative to their turnover (around 34% vs. only 10% for fund managers).
- Hedge funds are the only investors that were selling in net terms in 2023 YTD
- The net purchases by insurance companies and pension funds are very limited

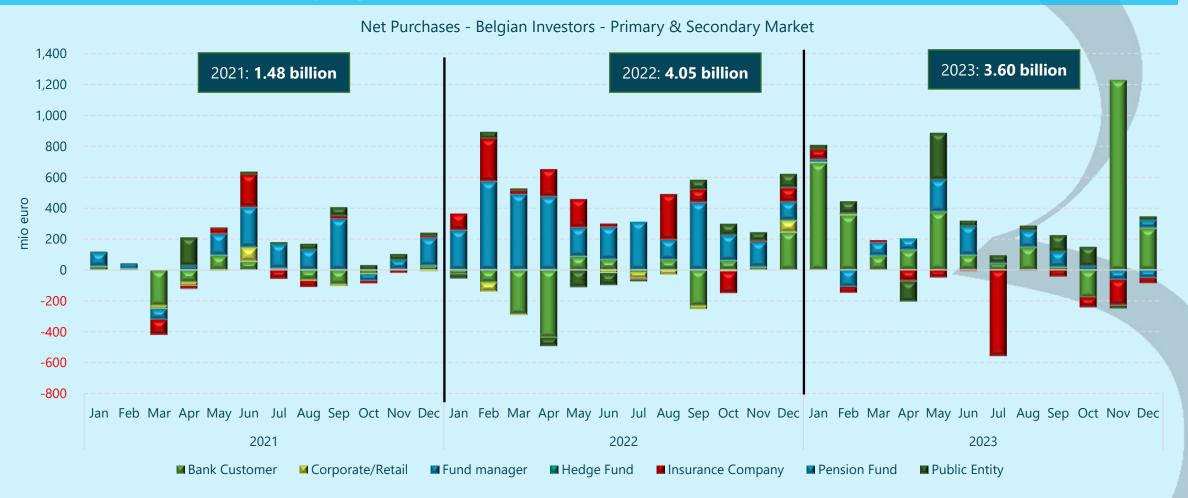

- More than ever, euro area investors are the most important buyers of OLOs
- Investors in the rest of Europe slightly decreased their net purchases
- Asian investors, being net sellers in 2021, are buying again in 2022 and 2023, but to a far less extent than in 2019.

### HRF reporting: OLO investor purchases in net terms (Belgium)

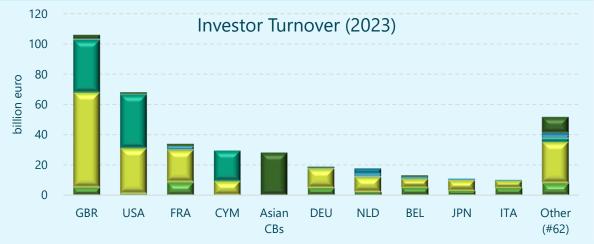

Important increase in purchases by Belgian investors in 2022 and in 2023

### 2023 OLO turnover & net sales – Top 10 countries

### Syndications + secondary market & excl. QE

- The UK and the USA are the countries with the highest turnover, principally due to fund managers and hedge funds. Together they are trading 44.84% of the total turnover
- The top 10 countries are doing 86.67% of the total turnover
- The group "Other" contains 62 countries in which fund managers are the largest group of investors

■ Corporate/Retail

- In terms of net sales, all countries in the top 10 are net buyers
- Asian central banks are second in terms of net purchases
- The group "Other" contains 62 countries. Especially customer banks (euro area) and fund managers are buying

■ Bank Customer

■ Insurance Company
■ Pension Fund

Hedge Fund

Grand Total

■ Fund manager

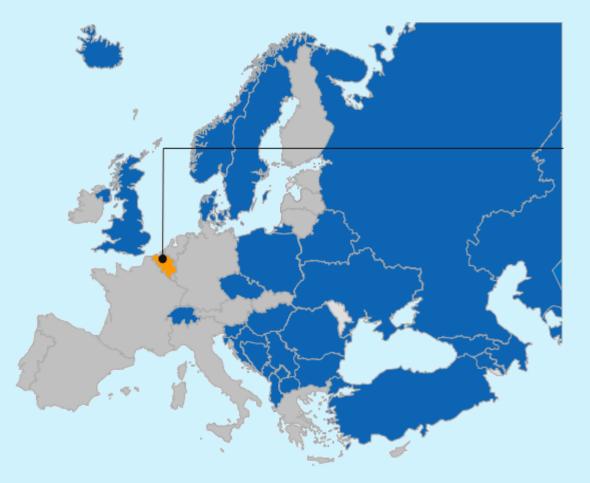

■ Public Entity

## Appendices

### Appendix 1 (Belgium's high level statistics)

Belgium has 3.3% of the EA20 population and produces 4.1% of EA20 GDP.

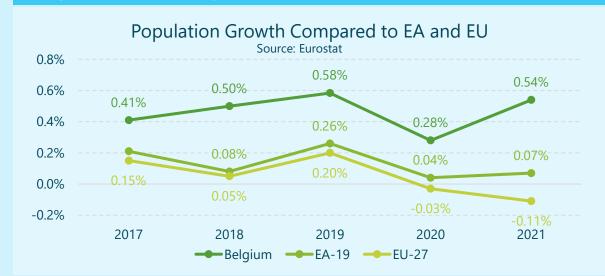

|             | 2022 GDP<br>(% EA20) | Population (millions) |
|-------------|----------------------|-----------------------|
| Germany     | 29.4%                | 83.2                  |
| France      | 20.4%                | 67.8                  |
| Italy       | 14.5%                | 59.0                  |
| Spain       | 9.8%                 | 47.4                  |

- With a fertility rate of 1.60 (2021) (EA20: 1.52) and positive net migration, Belgium's population has been one of the fastest growing in the EA/EU.
- Its population ranks 14th in terms of UN Human Development Index.
- Belgium obtains high scores in world rankings of competitiveness, absence of corruption, and private wealth.

### Appendix 2 (Belgian federal government)

On October 1st, 2020, 4 political families formed a 7-party coalition government at the federal level.

- regional level took place on **26 May 2019**.
- The Liberal-Socialist-Green-Christian Democrat coalition has **88 seats** out of 150.
- The Prime Minister is Mr.
   Alexander De Croo (Dutch speaking liberals).

N-VA (Dutch nationalists)
 PS (French socialists)
 MR (French liberals)
 Ecolo (French ecologists)
 CD&V (Dutch christian democrats)
 PTB/PVDA (French & dutch labour)
 Vlaams Belang (Dutch nationalists)
 SP.A (Dutch socialists)
 Open-VLD (Dutch liberals)
 Groen (Dutch ecologists)
 CDH (French democrats)
 DEFI (French centrists)

### Appendix 2 (Belgian federal government)

### Highlights of the 2020 Government Agreement

- **A government agreement** (in this case 73 pages) is the political agreement between the coalition partners. It indicates the broad lines of the expected policy of a government.
- More details will be available shortly when the government will introduce its budgetary plans in line with the European semester.
- In terms of financing its policy, the government is looking for 1/3 savings, 1/3 new income and 1/3 mixed measures.

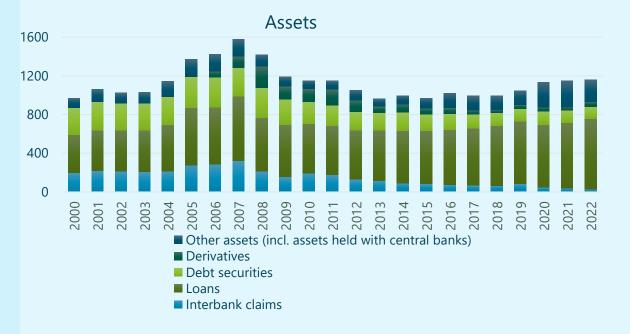

| HEALTH   | EUR 1.2 billion of additional investments, annual budget growth of 2.5% from 2022 onwards, public disclosure hospital performance   |
|----------|---|
| ECONOMY  | EUR 4.7 billion of stimulus, targeted employment rate of 80% by 2030, public investment rate of 4.0% by 2030, tax reform, digital taxation, contribution from highest net worth individuals |
| PENSIONS | Evolution towards minimal pension of EUR 1,500, introduction of pension bonus, convergence of different pensions systems  |
| GREEN    | Emissions -55% by 2030, climate neutrality by 2050, investments in railways, nuclear energy phase out   |
| POLITICS | New State reform in 2024 with homogeneous competency split, more autonomy for regions   |
| BUDGET   | Fixed improvement of the budget with 0.2% GDP p.a., additional variable improvement of 0.2% p.a. if potential GDP reached   |

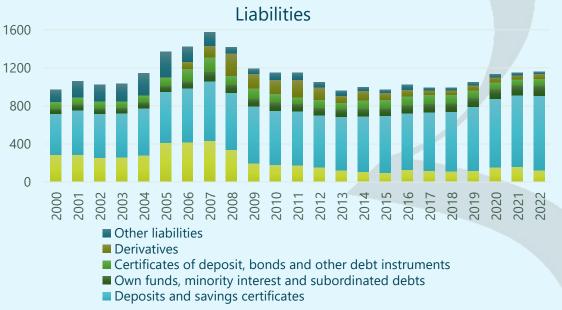

Belgium's financial sector: the strong deleveraging since 2007 has now come to an end.

Balance sheet structure of Belgian Credit Institutions (consolidated end-of-period data, in € billion)

Source: National Bank of Belgium – Financial Stability Report 2023

- Total assets of the banking sector decreased from **EUR 1,700 billion** in June 2008 to **EUR 1,158 billion** in December 2022, equivalent to some 210% of GDP.
- The high share of deposits and saving certificates is noticeable.
- In 2022, the overall customer loan-to-deposit ratio increased to **92.6%** (89.6% in 2021).

In 2022, profitability of banks remained at a high level, and sharply increased for insurance companies

### The Belgian government still holds significant stakes

Overview participations and guarantees for the financial sector:

| (in EUR unless otherwise stated) | State participation<br>(December 31, 2023) | Current guarantee<br>(Feb 13, 2024) | Maximum guarantee |
|----------------------------------|--|-------------------------------------|-------------------|
| BNP Paribas                      | 5.10% <sup>(*)</sup>                       | -                                   | -                 |
| Dexia                            | 50.02%(**)                                 | 20.36 billion                       | 43.70 billion     |
| Belfius                          | 100.00%                                    | _                                   | -                 |
| Ethias                           | 31.66%                                     | _                                   | -                 |

<sup>\*</sup> since Feb, 2023, and the sale of 33.3 million shares for 2.16 billion EUR.

- These resulted from the bail out operations in 2008/2009 (and 2011/2012 for Dexia)
- In addition, government **guarantees** declined markedly.
- In terms of dividends, the federal state received in 2023 EUR 384.4 million from Belfius, EUR 375.5 million from BNPP and EUR 34.2 million from Ethias.

<sup>\*\*</sup> minor stakes of Regions to be added

### DEXIA (BBB+/Baa3/BBB for DCL)

- On November 8, 2012, it was decided that Dexia would receive a capital injection of **EUR 5.5 billion** and that a definitive guarantee scheme of maximum **EUR 85 billion** would be installed, with negligible fees for Dexia.
- The European Commission approved this new aid measure.
- The new support will enable the **orderly resolution** of Dexia and the company is expected to respect minimal capital and liquidity ratios in future years.

| Balance sheet total<br>31/12/22 (EUR bn) | Common Equity Tier One (Basel III) | Cost/Income ratio | Net income 2022<br>(EUR millions) |
